Tork Wiping Paper Blue

Article	130035
System	M2 - Centerfeed system big
Colour	Blue
Ply	1
Roll length	165 m
Roll width	19.5 cm
Roll diameter	19 cm
Number of sheets	471
Sheet length	35 cm
Embossing	No
Print	No

The 1-ply multipurpose Tork Wiping Paper is strong and extra absorbent, which makes it ideal for wiping tasks and hand wiping. This paper can be used in the Tork® Centrefeed dispenser, which is a high capacity versatile solution for professional environments where both hand and surface wiping is required.

Key benefits:

- Tork Easy Handling® plastic packaging – for easier carrying and disposing of packaging
- Ideal for wiping hands and lightly soiled surfaces
- Multipurpose - handles general wiping tasks that require strength and absorbency
- Particularly good for cleaning glass - does not leave any lint or streaks on surfaces

Environmental

Material

Virgin fibres

We do not use softeners for professional hygiene products.

This product is certified for FSC®.

The packaging material is made from paper or plastic.

- defoamers (surfactants and dispersing agents)
- pH-control (sodium hydroxide and sulphuric acid)
- retention aids (chemicals that help to agglomerate small fibres to prevent fibre loss)
- Coating chemicals (that help to control the creping of the paper to make it soft and absorbent)

This product is certified for the EU Ecolabel.

- Wet strength agents (for Wipers and Hand Towels)
- Dry strength agents (are used together with mechanical treatment of the pulp to make strong products like wipers)
- For coloured papers dyes and fixatives (to secure perfect fastness of the colour) are added
- For printing products printing inks (pigments with carriers and fixatives) are applied
- For multi ply products we often use water soluble glue to secure the integrity of the product

In most of our mills we do not add optical brighteners.

Environmental certification

Bleaching is a cleaning process of the fibres and the aim is to achieve a bright pulp, but also to get a certain purity of the fibre in order to achieve the demands for hygiene products and in some cases to meet the requirements for food safety.

- Pulping aid (chemicals that help to repulp wet strong paper)

In the cleaning of our waste water we use flocculation agents and nutrients for the biological treatment to secure that no negative impact on water quality comes from our mills.

Production

This product is produced at VALLS mill, ES and certified according to ISO 9001, ISO 14001 (Environmental management systems), OHSAS 18001 and FSC Chain-Of-Custody.

Virgin pulp fibres are produced out of softwood or hardwood. The wood is subject to chemical and/or mechanical processes where the cellulose fibres are separated out and lignin and other residuals are removed.

Essity UK Ltd, Southfields Road,
Dunstable, Bedfordshire LU6 3EJ,
United Kingdom

High product quality is secured through quality and hygiene management systems throughout production, storage and transport.

To control product performance we use additives:

There are different methods used today for bleaching: ECF (elementary chlorine free, where chlorine dioxide is used, and TCF (totally chlorine free) where ozone, oxygen and hydrogen peroxide is used.

Food Contact

This product fulfills the legislative requirements for Food Contact materials, confirmed by external certification performed by a third party. The product is safe for wiping food contact surfaces and may also come occasionally into contact with foodstuffs for a short period of time.

In order to maintain a stable process and product quality the paper manufacturing process is supported by the following chemicals/ process aids:

Packaging

Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes

Chemicals

All chemicals (process aids as well as additives) are assessed from an environmental, occupational health and safety and product safety point of view.

Content

The product is made from

Virgin pulp
